

Clarification related to the Rule Part One 6.8.4.3.3 about swimsuit with period proof gusset / Absorbent element

6.8.4.3.3 At the location of the period-proof element, a third Material layer may be permitted. If a third Material lawyer is used, the thickness of the swimsuit at the location of the period-proof element may be a maximum total thickness of 2.5 mm.

A. Thickness

B. Construction of the absorbent element/period-proof gusset

The absorbent element/period-proof gusset, is considered as one single layer.

However, this absorbent element may be composed of multiple internal layers.
